

C & M-SERIES: AUTOMOTIVE

Interior, exterior, underhood, lighting, bumpers/fascia

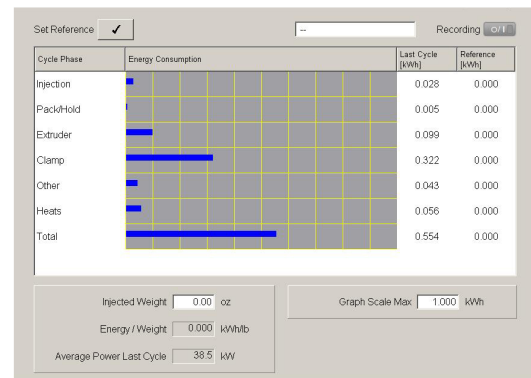

The automotive industry is constantly changing to more demanding and complex applications, increased connectivity, and less user interface between machine and part-removal. The Milacron C-Series and M-Series platforms are perfectly positioned to meet these needs with a customizable arsenal of robust automotive options to meet the entire market, ranging from 500-8,000 US tons.

C & M-SERIES: AUTOMOTIVE

Solutions for Automotive Applications

- 1) Unlock the future of injection molding with OPC-UA connectivity through all Milacron supplied auxiliary
- 2) Tier level performance pump packages to reduce lead time
- 3) Fully configurable core pulls
- 4) Eight freely configurable inputs and outputs
- 5) Milacron technology package for light weighting
- 6) In-mold decoration through partnership with Kurz
- 7) Automatic quick-mold change capability through Staubli
- 8) Parallel and perpendicular injection unit configurations for multi-shot, multi-material applications
- 9) Rotary table capability
- 10) Energy efficient with FANUC servo motor hydraulic system
- 11) Automotive-specific option packages
- 12) Proven robust, reliable, repeatable design
- 13) Screw technology for automotive applications (V-Bet)

COMPLETE AUXILIARY SYSTEMS DESIGN AND INSTALLATION
